#Professional Experience

Front-end Engineer | LDC | July 2021 – present | Edmonton, AB

Luau Data is a Canadian technology startup company that offers solar remote surveillance products.

- o Decreased setup time for customers by over 500% through the creation of the app.
 - o Chosen as the only employee representing the company at the Global Energy Show.
 - o Decreased the time needed to take and transfer pictures onto the app by 50% by implementing an RPC command system that allows the app and firmware to communicate.
 - o Single-handedly designed and developed the company website, which resulted in improved marketing and discoverability.
-

#Education

University of Saskatchewan Bachelor of Science | Computer Science | **Saskatoon, Sk**

Relevant Coursework: Full-Stack Web Programming, Intermediate Software Engineering, Implementation of Graphical User Interfaces, Developing Object-Oriented Systems

Online Training

Over 2000 hours of training at Freecode camp, Codingphase, and Udemy.

#Side Projects

ProDrones: Designed and developed a React website for a Drone company which included search engine optimization and styled-components as well as animations with Gsap and Framer Motion.

- o Used Framer Motion and Gsap to create all animations, as well as created UI design by prototype by using Figma.
- o Uploaded the project on Netlify via Github and utilized webhooks for automatic updates.
- o URL: <https://pronedrones.netlify.app>

Streaming Platform Application: Devised a movie streaming platform with React that allows

users to create an account, and used the movie API to dynamically render all movies. Created search and a watch later feature.

- o Uploaded the project on Netlify via Github and utilized webhooks for automatic updates.
- o Integrated StoryBook.js to record stories about each component, making components 100% reusable.
- o URL:<https://hbo-maxd.netlify.app>

Connect: Devised and developed a Next.js website with static site generation for a soon-to-launch fitness social media app.

- o Uploaded the project on Netlify via Github and utilized webhooks for automatic updates.
 - o Worked with Next.js in production.
 - o URL:<https://connect-site.netlify.app>
-
